

# ELAN Audio

# AAL-01

## “On-Air” Light Fitting

The AAL-01 "On-Air" Light is an elegant and durable solution to a requirement common to all Radio Stations

The AAL-01 is perfectly safe and does not require installation by a Qualified Electrician and can legally be installed by Station Staff

Being provided with "Keyhole Slots" in the back, and operated from a "Plug Pack" or similar safe 12V DC source, it is easy to install

Illumination is by Long Life "Jumbo" 60 mm Alphanumeric Displays, so there are no Bulbs or Globes to burn out

Operation is programmable by internal Jumper Links to give Steady Illumination on Power On, flashing ON AIR together, or alternate flashing ON then AIR

The AAL-01 is constructed in an extruded Aluminium Channel casing with Aluminium end caps, Powder coated in a modern Anotec Dark Grey colour and provided with a Red Perspex Filter Window

### Specifications

Power Source:	12V DC
Current Consumption:	350 mA Fully Illuminated
	200 mA Alternate Flashing

Weight: 1 KG

Dimensions: 340 mm Long x 100 mm High x 50 mm Deep

Although the power consumption of the AAL-01 is quite low, Elan Audio does recommend the use of a dedicated DC Power Supply such as a 12V DC Plug Pack or other type of power source

Never take DC Power from the Audio Mixer supply as this may lead to potential operational or other problems with the Mixer
